👤 SUMMARY

Experienced Full-Stack Developer with 4+ years of expertise in building robust web applications using PHP and the Laravel framework. Passionate about learning emerging technologies and collaborating with teams to deliver innovative, user-friendly solutions. Skilled in both front-end and back-end development, with a focus on creating scalable and efficient systems. Eager to grow in dynamic environments and contribute to achieving business goals through technical excellence.

📁 WORK EXPERIENCE

Full Stack Developer Laravel, Almayaar [🔗](#) 03/2025 – Present

I created a program for the residents of a residential complex to add to it the ability to follow up on electricity and water bills, etc., and pay them, make installment payments, request maintenance services, request online, and follow up on guests who are registered upon entry.

Full Stack Developer (Laravel), Snefru Soft [🔗](#) 07/2024 – 02/2025 | Cairo, Egypt

I worked on a number of applications and websites, including:

- yalla masyaf [🔗](#)
- wafar waksib [🔗](#)
- marboh gomla [🔗](#)
- tabarak market [🔗](#)
- real in [🔗](#)
- snefru soft [🔗](#)
- alrhal [🔗](#)
- snefru eats [🔗](#)

Back End Laravel, Senior Code 08/2024 – 12/2024

• I worked on a number of applications and websites, including the company website and website link [🔗](#).

Beack End Laravel, Lista [🔗](#) 05/2024 – 07/2024 | Cairo, Egypt

• I made some modifications to the Lista application link application [🔗](#).

senior Full stack Developer (Laravel), Acwad [🔗](#) 03/2024 – 05/2024

- I worked on an application similar to a bank that transfers currencies from one customer to another. I can also pay with a private card and pay for any merchant who has an account on the application.
- I have done another project, which is registering companies and adding representatives for each company and merchants. The representative follows up on all his work through the application to go to the merchants and sell the products he took from the company to these merchants.

Back End Developer Laravel, Tera Ninja 03/2023 – 03/2024

- I have completed a number of projects including consulting with lawyers, namely: Client Link [🔗](#) and Consultants Link [🔗](#).
- I created a project to request orders from the supermarket and show all the markets near your location.

Full stack Developer (Laravel), SahelBooxs [🔗](#) 11/2022 – 03/2023

I worked on the Sahel Booxs website throughout my work

Trainee Full Stack Developer, Sky Line Digital Solutions [🔗](#) 01/2021 – 06/2021 | cairo

- I have done more than one project front end using Tailwind CSS Framework
- I learned WordPress

- Worked with the team to develop and add more features to the sigmaeducational [↗](#)
- I learned SQL Server
- I learned C# and worked with Entity Framework but I may have little experience in this field

PORTFOLIO

Add Task

The page is using HTML, CSS and JavaScript, through which you can add an infinite number of tags and delete any tags, but when the page is loaded again, the data is deleted. [GitHub](#) [↗](#) and [Live Server](#) [↗](#)

Kin Car
